

I am going to go through the home pages one at a time to look at changes. This is what I have for the homepage.

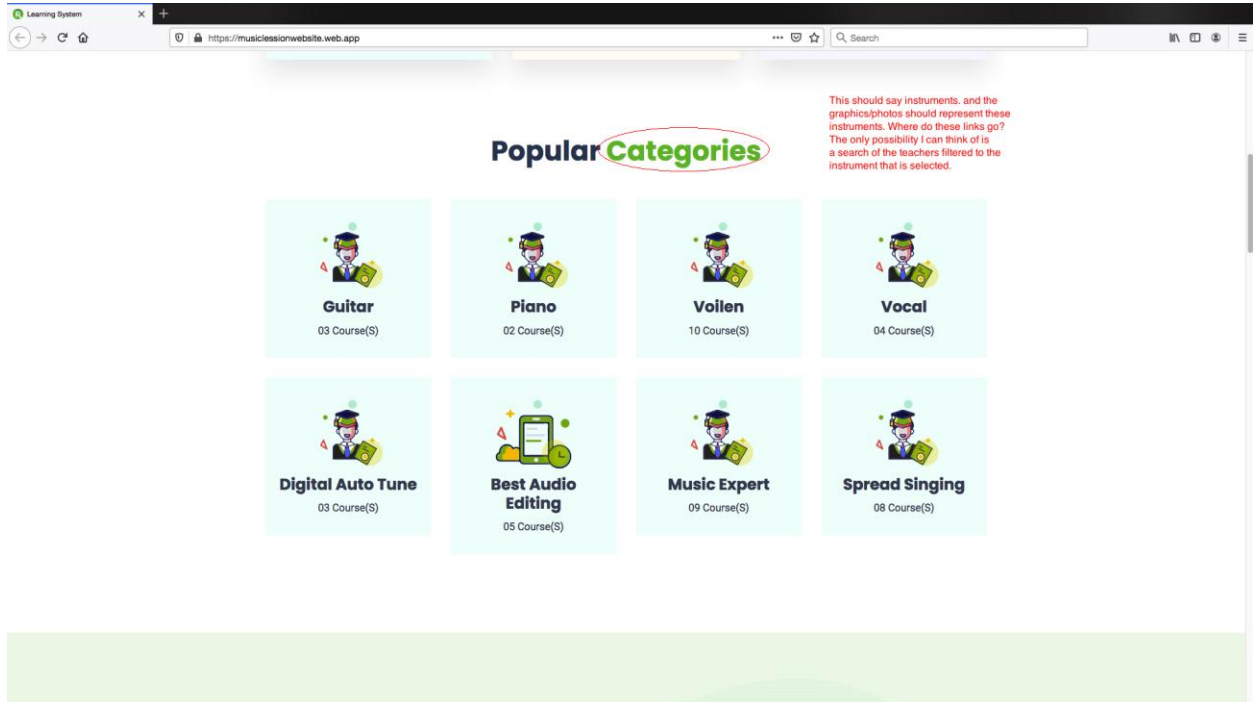

Homepage 1

- Once these cages are made I want to see how it looks with the logo in place. Should the logo be in the header, so it is always there no matter what page you are on?
- I will not comment on anything in the header for the other pages because it will be edited only once.
- A tag line I was using could be put on this page: "Love music? Learn to play!"
- Are the graphics and text content going to be easy to change in the future, if I wanted to edit the content?

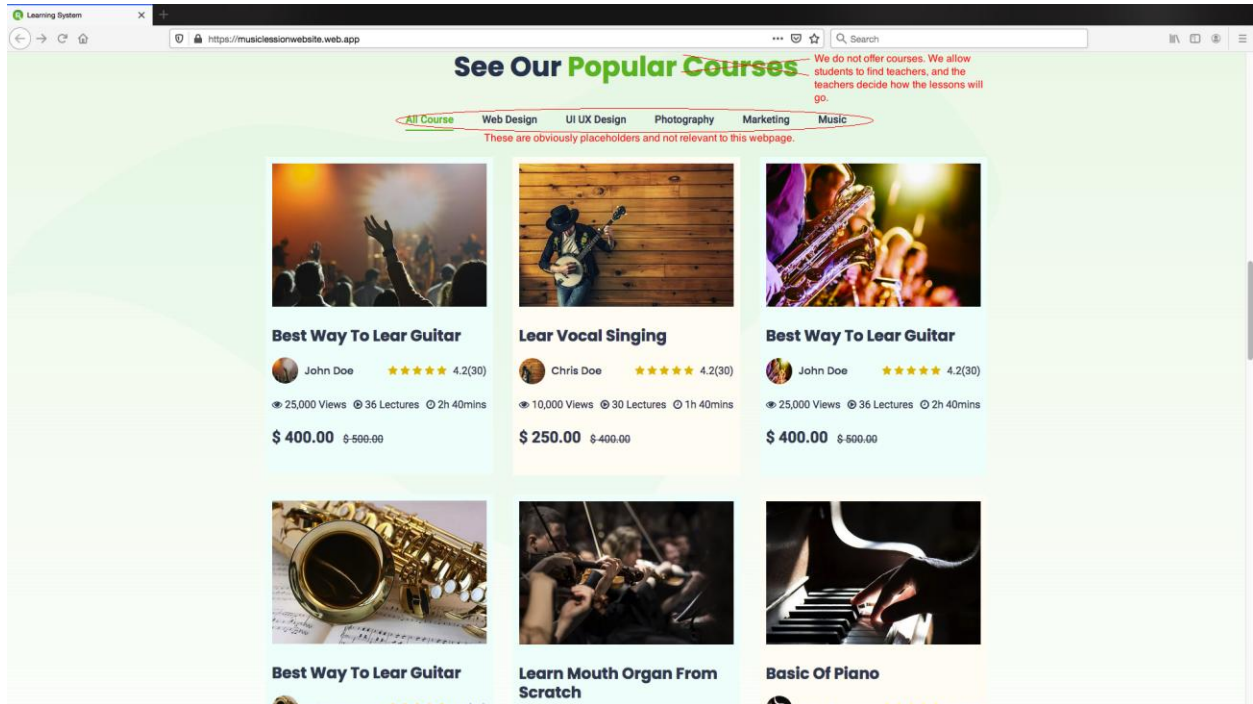

Homepage 2

This should show popular instruments, and instead of the number of courses (which we do not offer) it can list the number of teachers for each instrument? Will this change live as more teachers sign up?

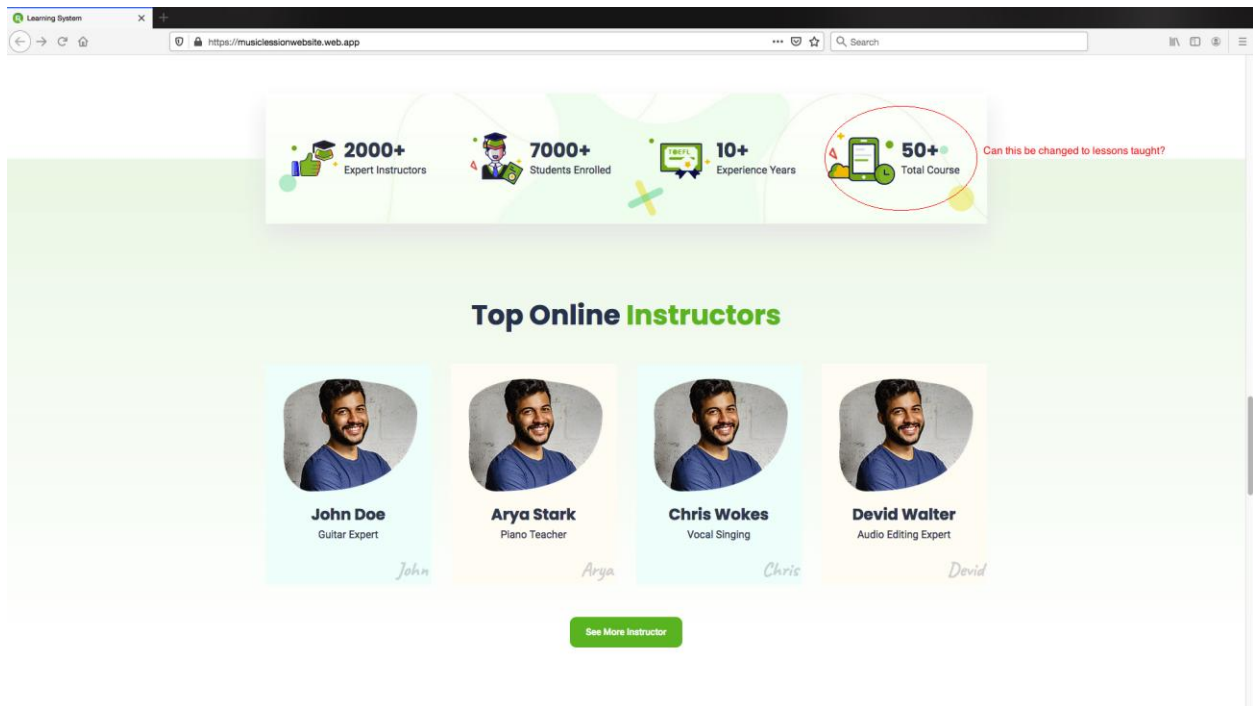

Homepage 3

Please remember the concept of this website. We DO NOT offer courses. We provide a connection for students and teachers. WE do not list course content because the teachers are responsible for having their own lesson plans. The view on this page would be better to list popular teachers.

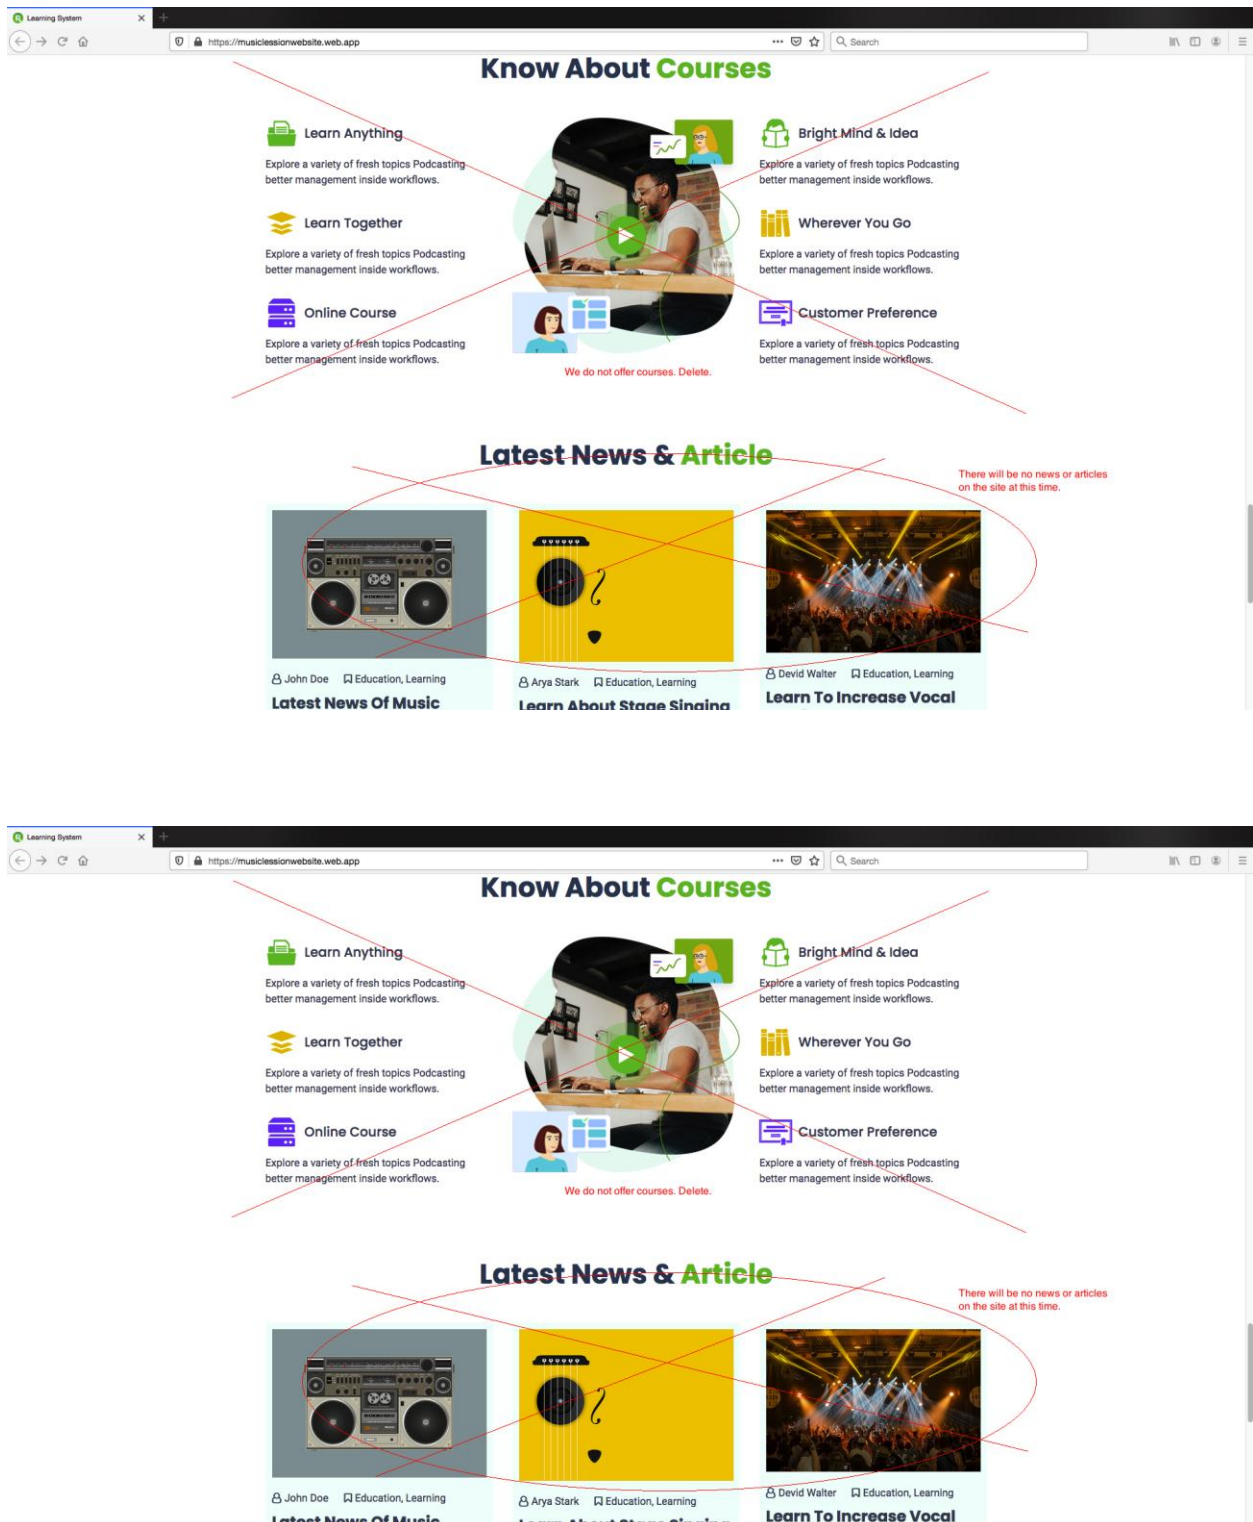

Homepage 4

Maybe the list of teachers could show a bit more information like in Homepage 3?

Homepage 5
Delete all of this.

Homepage 6

Same comment about courses. No address, email address or phone number is to be listed anywhere on the site.
